

Whipped Cocoa Bath Is Patented Treatment at The Spa At The Hotel Hershey

One of the most popular treatments at **The Spa At The Hotel Hershey** is officially unique. The distinctive **Whipped Cocoa Bath**, a foaming, therapeutic bath that launched when the “**Chocolate Spa**” opened in 2001, was awarded a United States patent (US 6,753,303 B2) in 2004 for its one-of-a-kind visual and sensual effects – akin to sitting in a cup of hot cocoa.

The 15-minute, \$45 bath treatment is patent-worthy because of the positive effects of aromatherapy produced by the cocoa scent; the benefits to the skin associated with milk baths; and the fine, long-lasting bubbles created by the concoction.

This patent is especially noteworthy, as it was among the first spa treatments to achieve such status. It serves as confirmation that the Spa’s efforts to create a truly unique experience for guests have been successful. It also was the first patent awarded to **Hershey Entertainment & Resorts**, the company that owns and operates **The Spa At The Hotel Hershey**.

The Spa has developed this at-home recipe for the **Whipped Cocoa Bath**:

INGREDIENTS

1/8 cup Hershey’s unsweetened cocoa powder

1/3 cup instant non-fat dry milk

½ cup **Whipped Cocoa Bath** signature bath product (see below for sources)

METHOD

For those who truly wish to indulge, this bath is best in a whirlpool tub, creating a frothy, foamy effect.

Add cocoa powder and dry milk powder while the tub is filling. Add **Whipped Cocoa Bath**, and then turn on the whirlpool.

Bath-lovers who don't have **Whipped Cocoa Bath** can try any unscented bubble bath. They can intensify the chocolaty experience by lighting cocoa-scented candles.

The Spa At The Hotel Hershey sells 8-ounce bottles of **Whipped Cocoa Bath** for \$19 each. This and other signature products from the Spa and its salon can be purchased at the Spa, by calling 1-877-772-9988, or by visiting www.ChocolateSpa.com.
